

WeavePerf® acoustic curtain

Transparent sound-absorbing fabric

WORLD NOVELTY
 1 mio slots / sqm!

Acoustic optimisation by interior decoration without structural work!

As from now on, you can improve room acoustics with one single light and still transparent material. Large glass surfaces are significant for the cross reflection of sound. For this reason, you achieve ideal sound absorption in a multi-person office in particular using the transparent acoustic curtains **WeavePerf®**. It offers the perfect solution also for acoustic optimization of exhibition rooms, lofts, restaurants, ticket halls, etc.

Surface curtains

Advantages:

- Transparent
- Inexpensive acoustic optimisation
- Without any structural work

Example: Partition system

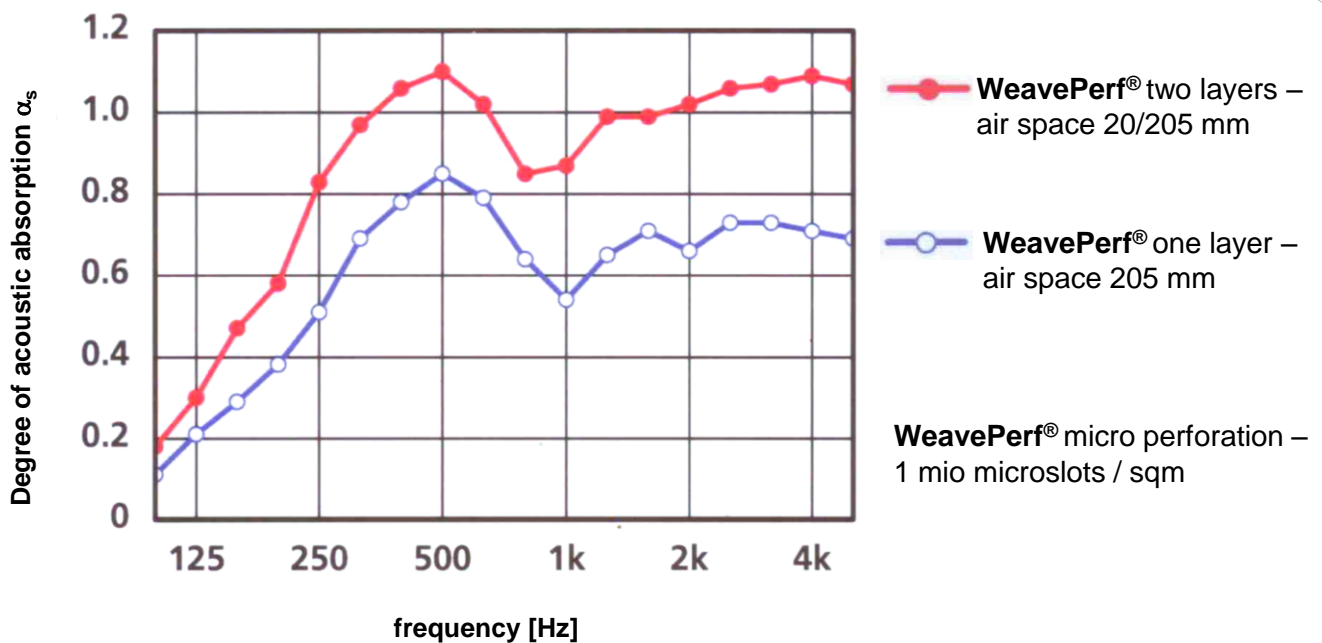

Other applications:

- Ceiling and wall covering
- Ceiling sails
- Transparent partitions
- Lamella curtain
- Flexible room systems
